

Features

- Tight DC breakdown voltage tolerance ($\pm 10\%$)
- Long-life tungsten or molybdenum electrodes
- Rugged ceramic-to-metal or glass-to-metal construction

Applications

- Test equipment
- Video displays
- Pulse generators
- Medical electronics

Description

High Energy Devices' TG Legacy Series of two electrode sparkgaps excel in applications that require the efficient transfer of high voltage, high energy pulses and DC overvoltage protection for magnetrons, diodes, capacitors, etc.

Voltage Range

Series	DC Breakdown Voltage	Units
TG Two Electrode	.2-60.0	kV

Devices in the TG Two-Electrode Legacy Series with other breakdown voltages in the .2-60.0kV range are available upon request. Also refer to the SB/SG Series Spark Gaps for additional product availability.

Ordering Information

A complete part number is represented by the information contained in the Part Number column of the specification table.

⁽¹⁾ 6-32 tapped hole in non-tubulated end.

⁽²⁾ Identical tubulation on both ends.

⁽³⁾ The voltage level at which the spark discharge occurs when a unipolarity pulse train is applied to the gap. Typically, the pulse repetition rate is 400 pps (pulses/second) with a rise time of 0.3 μs and a pulse width of 0.5 μs. The "initial" range specifies at what increasing voltage the gap begins to fire and the "rep" range specifies at what decreasing voltage the gap ceases to fire repetitively.

⁽⁴⁾ Pulse repetition rate is 1500pps instead of the standard 400pps.

⁽⁵⁾ Though outlines 2, 3, and 3A are identical, the electrode materials and configurations vary internally.

⁽⁶⁾ Though outlines 4 and 4A are identical, gaps with outline 4A have heavier internal construction to withstand more severe shock and vibration.
